JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Author Index to Volume 57

Agosto, Denise E.
[book review], 585–586, 1708–1709
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426

Aguillo, Isidro F.
scientific research activity and communication measured with cybermetrics indicators, 1296–1302

Akiva, Navot
feature instability as a criterion for selecting potential style markers, 1519–1525

Aksnes, Dag W.
citation rates and perceptions of scientific contribution, 169–185

Al, Umut
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022

Aqeel, Syed Uzair
on the development of name search techniques for Arabic, 728–739

Archambault, Éric
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004

Argamon, Shlomo
introduction to the special topic section on the computational analysis of style, 1503–1505

Aringhieri, Roberto
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537

Asonuma, Akihiro
reflections on the age distribution of Japanese scientists, 342–346

Aula, Anne
modeling successful performance in Web searching, 1678–1693

Avrahami, Thi Truong
The FedLemur Project: federated search in the real world, 347–358

Awazu, Yukika
[book review], 1709–1710
factors governing the consumption of explicit knowledge, 36–43

Bai, Bing
automated judgment of document qualities, 1155–1164

Bailón-Moreno, Rafael
a bibliometric model for journal discarding policy at academic libraries, 198–207
the scientific network of surfactants: structural analysis, 949–960

Bar-Ilan, Judit
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589

Barjak, Franz
the role of the Internet in informal scholarly communication, 1350–1367

Barkow, Philip
how much of it is real? analysis of paid placement in Web search engine results, 448–461

Barry, Carol L.
in this issue, 1–3, 149–151, 297–298, 447, 587, 727, 847–850, 993–995, 1135–1137, 1281–1283, 1415–1417, 1563–1565, 1713–1714, 1859–1861

Bates, Marcia J.
fundamental forms of information, 1033–1045

Beale, Russell
improving Internet interaction: from theory to practice, 829–833

Beaulieu, Micheline
which user interaction for cross-language information retrieval? design issues and reflections, 709–722

Beheshti, Jamshid
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Beitzel, Steve
on the development of name search techniques for Arabic, 728–739

Benoit, Gerald
[book review], 1855–1858

Bensman, Stephen
classification and powerlaws: the logarithmic transformation, 1470–1486

Bhavnani, Suresh K.
strategy hubs: domain portals to help find comprehensive information, 4–24

Bichakjian, Christopher K.
strategy hubs: domain portals to help find comprehensive information, 4–24

Birnholtz, Jeremy P.
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770

Blake, Catherine
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895

Block, Sharon
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767

Blocks, Dorothee
a reference model for user-system interaction in thesaurus-based searching, 1655–1665

Bodoff, David
documents and queries as random variables: history and implications, 1138–1154
relevance for browsing, relevance for searching, 69–86

Bot, Razvan Stefan
finding nuggets in documents: a machine learning approach, 740–752

Bouhnik, Dan
interaction in distance-learning courses, 299–305

Boyack, Kevin W.
identifying a better measure of relatedness for mapping science, 251–263

Brody, Tim
earlier Web usage statistics as predictors of later citation impact, 1060–1072

Buchanan, George
changing the pace of search: supporting "background" information seeking, 838–842

Burrell, Quentin L.
on Egghe's version of continuous concentration theory, 1406–1411
some comments on the use of reliability techniques [letter to the editor], 991–992

Calado, Pável
link-based similarity measures for the classification of Web documents, 208–221

Callan, Jamie
The FedLemur Project: federated search in the real world, 347–358

Carr, Leslie
earlier Web usage statistics as predictors of later citation impact, 1060–1072

Chan, Hock Chuan
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
understanding competing application usage with the theory of planned behavior, 1338–1349

Chao, T.-C.
visualizing the scientific world and its evolution, 1461–1469

Chau, Michael
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683

Che, Haoyang
[book review], 1132

Chen, C.-M.
visualizing the scientific world and its evolution, 1461–1469

Chen, Chaomei
CiteSpace II: detecting and visualizing emerging trends and transient patterns in scientific literature, 359–377

Chen, Hao
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460

Chen, Hsin-Hsi
translating–transliterating named entities for multilingual information access, 645–659

Chen, Hsinchun
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683

Chen, Jiangping
a lexical knowledge base approach for English–Chinese cross-language information retrieval, 233–243
Chen, Liang
a "stereo" document representation for textual information retrieval, 768–774
Chen, Xin
finding nuggets in documents: a machine learning approach, 740–752
Chen, Zhiwei
relevance judgment: what do information users consider beyond topicality?, 961–973
Cheng, Tzu-Chiang
changing the pace of search: supporting "background" information seeking, 838–842
Cheung, Christy M. K.
understanding consumer trust in Internet shopping: a multidisciplinary approach, 479–492
Chiang, Roger H. L.
extracting link chains of relationship instances from a Web site, 1590–1605
Chien, Lee-Feng
exploiting the Web as the multilingual corpus for unknown query translation, 660–670
Clough, Paul
user experiments with the Eurovision cross-language image retrieval system, 697–708
Coiera, Enrico W.
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
Cole, Charles
human information behavior: integrating diverse approaches and information use, 25–35
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220
Conrad, Jack G.
managing déjà vu: collection building for the identification of nonidentical duplicate documents, 921–932
Crestani, Fabio
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890
Cristo, Marco
link-based similarity measures for the classification of Web documents, 208–221
Cronin, Blaise
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918
using the *h*-index to rank influential information scientists, 1275–1278
Crystal, Abe
relevance criteria identified by health information users during Web searches, 1368–1382
Cullen, John
[book review], 1711–1712
Cunliffe, Daniel
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
Dagan, Ido
feature instability as a criterion for selecting potential style markers, 1519–1525
Daizadeh, Iraj
an example of information management in biology: qualitative data economizing theory applied to the Human Genome Project databases, 244–250
Damiani, Ernesto
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537
Datta, Pratim
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393
Davis, Lynne
designing a search user interface for a digital library, 788–791
Davis, Philip M.
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248
De Capitani Di Vimercati, Sabine
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537
De La Moneda, Mercedes
a bibliometric model for journal discarding policy at academic libraries, 198–207
de Moura, Edleno S.
link-based similarity measures for the classification of Web documents, 208–221
Demner-Fushman, Dina
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Desouza, Kevin C.
factors governing the consumption of explicit knowledge, 36–43
Detlor, Brian
gender and Web information seeking: a self-concept orientation model, 1105–1115
Dhatric, Praveen
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707
Du, Heather
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890
Dubnov, Shlomo
structural and affective aspects of music from statistical audio signal analysis, 1526–1536
Duwairi, Rehab M.
machine learning for Arabic text categorization, 1005–1010
Egghe, L.
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177
Elovici, Yuval
a decision theoretic approach to combining information filters: an analytical and empirical evaluation, 306–320
Ennis, Lisa A.
[book review], 443, 1280
Ercegovac, Zorana
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032
Eseryel, U. Yeliz
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Fairclough, Ruth
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654
Web issue analysis: an integrated water resource management case study, 1303–1314
Fang, Yong
reflections on the age distribution of Japanese scientists, 342–346
Figueredo, Eduardo
the numerical equivalence between the impact factor of journals and the quality of the articles [letter to the editor], 1561
Finn, Aidan
learning to classify documents according to genre, 1506–1518
Fleischmann, Kenneth R.
[book review], 989–990
do-it-yourself information technology: role hybridization and the design—use interface, 87–95
Franks, Sara
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918
Freitas-Junior, Hermes R.
categorization-driven cross-language retrieval of medical information, 501–510
Frieder, Ophir
on the development of name search techniques for Arabic, 728–739
Galloway, Patricia
[book review], 723–724
Garcés, Pablo J.
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
Gay, Geri
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
Geisler, Gary
the open video digital library: a Möbius strip of research and practice, 1629–1643
Genuis, Shelagh K.
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
Gero, John S.
a qualitative feature-based characterization of 2D architectural style, 1537–1550
Gingras, Yves
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
Gonçalves, Marcos André
link-based similarity measures for the classification of Web documents, 208–221
Goodrum, Abby A.
the diffusion of theories: a functional approach, 330–341

DOI: 10.1002/asi

Granadino, Begoña
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
Greenberg, Jane
relevance criteria identified by health information users during Web searches, 1368–1382
Gremett, Peter
utilizing a user's context to improve search results, 808–812
Grossman, David
on the development of name search techniques for Arabic, 728–739
Harnad, Stevan
earlier Web usage statistics as predictors of later citation impact, 1060–1072
Harris, Lydia Eato
[book review], 1279–1280
Hartley, James
reading and writing book reviews across the disciplines, 1194–1207
Haythornthwaite, Caroline
learning and knowledge networks in interdisciplinary collaborations, 1079–1092
Heinström, Jannica
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450
Hembrooke, Helene
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
Hendry, David G.
workspaces for search, 800–802
Hernández, Naybell
building interoperable vocabulary and structures for learning objects, 280–292
Herrera-Viedma, Enrique
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
soft approaches to information retrieval and information access on the Web: an introduction to the special topic section, 511–514
Hong, Traci
the influence of structural and message features on Web site credibility, 114–127
Hsieh, Ming H.
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829
Huang, Zan
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
Hughes-Hassell, Sandra
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426
Humphrey, Susanne M.
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Huntington, Paul
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
Hupfer, Maureen E.
gender and Web information seeking: a self-concept orientation model, 1105–1115
Ivanisevic, Ranka
multiple authorship in a small medical journal: a case study of the *Croatian Medical Journal*, 1073–1078
Jain, Preeti
changing the pace of search: supporting "background" information seeking, 838–842
Jamali, Hamid R.
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
Jansen, Bernard J.
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
Web searching on the Vivisimo search engine, 1875–1887
Järvelin, Kalervo
"irrational" searchers and IR-rational researchers, 222–232
Jensen, Eric
on the development of name search techniques for Arabic, 728–739
Jiménez-Contreras, Evaristo
a bibliometric model for journal discarding policy at academic libraries, 198–207
Johnson, Timothy M.
strategy hubs: domain portals to help find comprehensive information, 4–24
Jones, Matt
changing the pace of search: supporting "background" information seeking, 838–842
Jupp, Julie R.
a qualitative feature-based characterization of 2D architectural style, 1537–1550
Jurado-Alameda, Encarnación
the scientific network of surfactants: structural analysis, 949–960
Kageura, Kyo
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
Käki, Mika
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
Kalbach, James
"I'm feeling lucky": the role of emotions in seeking information on the Web, 813–818
Kantor, Paul B.
automated judgment of document qualities, 1155–1164
cross-evaluation: a new model for information system evaluation, 614–628
a decision theoretic approach to combining information filters: an analytical and empirical evaluation, 306–320
Karamuftuoglu, Murat
information arts and information science: time to unite?, 1780–1793
Katz, Boris
building a reusable test collection for question answering, 851–861
Kelly, Diane
measuring online information seeking context, part 1: background and method, 1729–1739
Kelly, Diane *(Continued)*
measuring online information seeking context, part 2: findings and discussion, 1862–1874
Kifle, Mengistu
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393
Kilicoglu, Halil
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Kim, Hee-Woong
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
Kim, Jong-Ae
toward an understanding of Web-based subscription database acceptance, 1715–1728
Klavans, Richard
identifying a better measure of relatedness for mapping science, 251–263
Knothe, Gerhard
comparative citation analysis of duplicate or highly related publications, 1830–1839
Koc, Mustafa
[book review], 444–445
Komlodi, Anita
search histories for user support in user interfaces, 803–807
Koppel, Moshe
feature instability as a criterion for selecting potential style markers, 1519–1525
Koshman, Sherry
Web searching on the Vivisimo search engine, 1875–1887
Kuperman, Victor
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
Kushmerick, Nicholas
learning to classify documents according to genre, 1506–1518
Laender, Alberto H. F.
categorization-driven cross-language retrieval of medical information, 501–510
Lam, Wai
introduction to the special topic section on multilingual information systems, 629–631
Lanau, Sergi
image clustering for the exploration of video sequences, 577–584
Landry, Carol Fay
work roles, tasks, and the information behavior of dentists, 1896–1908
Large, Andrew
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220
Larivière, Vincent
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
Lau, Annie Y. S.
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
Lee, Changki
an effective procedure for constructing a hierarchical text classification system, 431–442

DOI: 10.1002/asi

Lee, Gary Geunbae
an effective procedure for constructing a hierarchical text classification system, 431–442

Lee, Matthew K. O.
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
understanding consumer trust in Internet shopping: a multidisciplinary approach, 479–492

Lefford, Nyssim
modal relationships as stylistic features: examples from Seljuk and Celtic patterns, 1551–1560

Leide, John E.
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Levin, Stephen
which user interaction for cross-language information retrieval? design issues and reflections, 709–722

Leydesdorff, Loet
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
classification and powerlaws: the logarithmic transformation, 1470–1486
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Li, Dongmin
evaluating China's university library Web sites using correspondence analysis, 493–500

Li, Jiexun
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393

Li, Kar Wing
conceptual analysis of parallel corpus collected from the Web, 632–644

Li, Quanzhi
finding nuggets in documents: a machine learning approach, 740–752

Lim, Ee-Peng
extracting link chains of relationship instances from a Web site, 1590–1605
Web unit-based mining of homepage relationships, 394–407

Lima, Luciano R. S.
categorization-driven cross-language retrieval of medical information, 501–510

Lin, Jimmy
building a reusable test collection for question answering, 851–861

Lin, Julian
understanding competing application usage with the theory of planned behavior, 1338–1349

Lin, Wei-Hao
translating–transliterating named entities for multilingual information access, 645–659

Lin, Wen-Cheng
translating–transliterating named entities for multilingual information access, 645–659

Little, Roderick J.
strategy hubs: domain portals to help find comprehensive information, 4–24

Liu, Hsing-Piao
technological innovation assessment of business-to-business electronic marketplaces, 1093–1104

Liu, Lu
user preference: a measure of query-term quality, 1566–1580

Liu, W.-C.
visualizing the scientific world and its evolution, 1461–1469

Loia, Vincenzo
Web navigation support by means of proximity-driven assistant agents, 515–527

Lopez-Herrera, Antonio G.
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549

Lu, Wen-Hsiang
exploiting the Web as the multilingual corpus for unknown query translation, 660–670

Mackenzie, Maureen L.
ASIS to ASIS&T: a society in transition?, 1750–1757

Marchionini, Gary
the open video digital library: a Möbius strip of research and practice, 1629–1643
search histories for user support in user interfaces, 803–807

Marcus, Tali
interaction in distance-learning courses, 299–305

Martens, Betsy Van der Veer
the diffusion of theories: a functional approach, 330–341

Mbarika, Victor W. A.
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

McAdams, Stephen
structural and affective aspects of music from statistical audio signal analysis, 1526–1536

McClean, Sally
improving high accuracy retrieval by eliminating the uneven correlation effect in data fusion, 1962–1973

Meho, Lokman I.
e-mail interviewing in qualitative research: a methodological discussion, 1284–1295
using the *h*-index to rank influential information scientists, 1275–1278

Meso, Peter
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197

Miyamoto, Sadaaki
image clustering for the exploration of video sequences, 577–584

Mochel, Karl
search in the Web shopping environment, 819–824

Musiorski, Kevin M.
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232

Naing, Myo-Myo
extracting link chains of relationship instances from a Web site, 1590–1605

Nayar, Pramod K.
[book review], 724–725

Nelson, Jeremy
[book review], 294–295

Newman, David J.
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767

Ng, Kwong Bor
automated judgment of document qualities, 1155–1164

Nicholas, David
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851

Nicholson, Scott
how much of it is real? analysis of paid placement in Web search engine results, 448–461

Nilan, Michael
technology, genres, and value change: the case of little magazines, 862–872

Nordhausen, Klaus
modeling successful performance in Web searching, 1678–1693

Oard, Douglas W.
using rhythms of relationships to understand e-mail archives, 1936–1948

Olivas, José A.
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576

Ortega, José L.
scientific research activity and communication measured with cybermetrics indicators, 1296–1302

Özkar, Mine
modal relationships as stylistic features: examples from Seljuk and Celtic patterns, 1551–1560

Paling, Stephen
technology, genres, and value change: the case of little magazines, 862–872

Palmer, Brent O.
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232

Pan, Bing
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325

Pan, Gary
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829

Pan, Shan
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829

Paraboschi, Stefano
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537

Park, Ji-Hong
how much of it is real? analysis of paid placement in Web search engine results, 448–461

DOI: 10.1002/asi

Pasi, Gabriella
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
soft approaches to information retrieval and information access on the Web: an introduction to the special topic section, 511–514
Peck, Frederick A.
strategy hubs: domain portals to help find comprehensive information, 4–24
Pedrycz, Witold
Web navigation support by means of proximity-driven assistant agents, 515–527
Perer, Adam
using rhythms of relationships to understand e-mail archives, 1936–1948
Petrelli, Daniela
which user interaction for cross-language information retrieval? design issues and reflections, 709–722
Pharo, Nils
"irrational" searchers and IR-rational researchers, 222–232
Porcel, Carlos
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
Pozo, Erika J.
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Prabowo, Rudy
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654
Pratt, Wanda
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895
Price, Jason S.
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248
Price, Liz
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
Prieto, José A.
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
Qin, Jialun
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
Qin, Jian
building interoperable vocabulary and structures for learning objects, 280–292
Raban, Daphne R.
the effect of source nature and status on the subjective value of information, 321–329
Radford, Marie L.
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059
Rafaeli, Sheizaf
the effect of source nature and status on the subjective value of information, 321–329
Raghavan, Vijay
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707
Rantanen, Esa M.
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232
Resnick, Marc L.
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
best practices and future visions for search user interfaces, 781–787
search user interfaces: best practices and future visions. introduction and overview, 777–780
Revie, Crawford
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
Reynolds, Roger
structural and affective aspects of music from statistical audio signal analysis, 1526–1536
Ribeiro-Neto, Berthier
categorization-driven cross-language retrieval of medical information, 501–510
link-based similarity measures for the classification of Web documents, 208–221
Rindflesch, Thomas C.
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Rittman, Robert
automated judgment of document qualities, 1155–1164
Rogers, Willie J.
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Romero, Francisco P.
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
Rose, Daniel E.
reconciling information-seeking behavior with search user interfaces for the Web, 797–799
Roto, Virpi
search on mobile phones, 834–837
Rousseau, Ronald
reflections on the age distribution of Japanese scientists, 342–346
timelines in citation research, 1404–1405
Ruiz-Baños, Rosario
a bibliometric model for journal discarding policy at academic libraries, 198–207
the scientific network of surfactants: structural analysis, 949–960
Ruiz de Osma, Elvira
a bibliometric model for journal discarding policy at academic libraries, 198–207
Ruthven, Ian
a study of interface support mechanisms for interactive information retrieval, 933–948
Sacco, Giovanni M.
dynamic taxonomies and guided searches, 792–796
Saggion, Horacio
[book review], 144–146
Sahiner, Mustafa
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
Samarati, Pierangelo
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537
Samoylenko, I.
visualizing the scientific world and its evolution, 1461–1469
Sanderson, Mark
user experiments with the Eurovision cross-language image retrieval system, 697–708
which user interaction for cross-language information retrieval? design issues and reflections, 709–722
Sapunar, Damir
multiple authorship in a small medical journal: a case study of the *Croatian Medical Journal*, 1073–1078
Savolainen, Reijo
information use as gap-bridging: the viewpoint of sense-making methodology, 1116–1125
Saylor, John
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
Schneiderman, Ben
using rhythms of relationships to understand e-mail archives, 1936–1948
Schriber, Cindy P.
managing déjà vu: collection building for the identification of nonidentical duplicate documents, 921–932
Schwartz, Jennifer L.
strategy hubs: domain portals to help find comprehensive information, 4–24
Senatore, Sabrina
Web navigation support by means of proximity-driven assistant agents, 515–527
Sessa, Maria I.
Web navigation support by means of proximity-driven assistant agents, 515–527
Shachak, Aviv
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
Shah, Biren
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707
Shantz, Jeff
[book review], 1854–1855
Shapira, Bracha
a decision theoretic approach to combining information filters: an analytical and empirical evaluation, 306–320
Shen, Chong
evaluating China's university library Web sites using correspondence analysis, 493–500

DOI: 10.1002/asi

Shen, Xiangxing
evaluating China's university library Web sites using correspondence analysis, 493–500
Shiri, Ali
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
Si, Luo
The FedLemur Project: federated search in the real world, 347–358
Sia, Choon-Ling
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
Sierra, Tito
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Smalheiser, Neil R.
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
Soares, Andrey
[book review], 293–294
Soergel, Dagobert
search histories for user support in user interfaces, 803–807
Song, Peng
automated judgment of document qualities, 1155–1164
Spink, Amanda
human information behavior: integrating diverse approaches and information use, 25–35
Web searching on the Vivisimo search engine, 1875–1887
Stock, Mechtild
intellectual property information: a comparative analysis of main information providers, 1794–1803
Stock, Wolfgang G.
intellectual property information: a comparative analysis of main information providers, 1794–1803
on relevance distributions, 1126–1129
Strecher, Victor J.
strategy hubs: domain portals to help find comprehensive information, 4–24
Strzalkowski, Tomek
automated judgment of document qualities, 1155–1164
Stuart, David
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779
Su, Yu
[book review], 1977–1978
Sun, Aixin
Web unit-based mining of homepage relationships, 394–407
Sun, Ying
automated judgment of document qualities, 1155–1164
cross-evaluation: a new model for information system evaluation, 614–628
Sundin, Olof
[book review], 1852–1853
Sutcliffe, Richard F. E.
applying incremental tree induction to retrieval from manuals and medical texts, 588–600
Swanson, Don R.
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
Taddeo, Laura
[book review], 843–844
Tan, Cheng Yian (Bernard)
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677
Tan, Weai Chee
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
Tang, Rong
automated judgment of document qualities, 1155–1164
Taniguchi, Shoichi
a system for supporting evidence recording in bibliographic records, 1249–1262
Teng, Jei-Wen
exploiting the Web as the multilingual corpus for unknown query translation, 660–670
Tenopir, Carol
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
Teo, Hock-Hai
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
Thelwall, Mike
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654
interpreting social science link analysis research: a theoretical framework, 60–68
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779
Web issue analysis: an integrated water resource management case study, 1303–1314
Tokuda, Naoyuki
a "stereo" document representation for textual information retrieval, 768–774
Tompson, Sara R.
[book review], 1130–1132
Tonta, Yasar
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
Torra, Vincenç
image clustering for the exploration of video sequences, 577–584
Torvik, Vetle I.
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
Tsuji, Keita
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
Tudhope, Douglas
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
Vale, Rodrigo F.
categorization-driven cross-language retrieval of medical information, 501–510
Van der Veer Martens, Betsy
the diffusion of theories: a functional approach, 330–341
van Raan, Anthony F. J.
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430
Vann, Katie
Web issue analysis: an integrated water resource management case study, 1303–1314
Vaughan, Liwen
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
visualizing linguistic and cultural differences using Web co-link data, 1178–1193
Vaughan, Misha W.
best practices and future visions for search user interfaces, 781–787
search user interfaces: best practices and future visions. introduction and overview, 777–780
Veith, Richard H.
[book review], 844–846
Memex at 60: Internet or iPod?, 1233–1242
Vignola-Gagné, Étienne
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
Vishwanath, Arun
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460
Wacholder, Nina
automated judgment of document qualities, 1155–1164
user preference: a measure of query-term quality, 1566–1580
Walters, Glenn D.
measuring the utility of journals in the crime-psychology field: beyond the impact factor, 1804–1813
Wan, Yun
factors governing the consumption of explicit knowledge, 36–43
Wang, Fu Lee
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696
Wang, Jenq-Haur
exploiting the Web as the multilingual corpus for unknown query translation, 660–670
Wang, Jun
automatic thesaurus development: term extraction from title metadata, 907–920
Wang, Xinwei
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
Ward, Jane
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Warner, Julian
[book review], 146–147
Wei, Kwok-Kee
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279

DOI: 10.1002/asi

Wei, Kwok-Kee *(Continued)*
understanding competing application usage with the theory of planned behavior, 1338–1349

White, Kieran J.
applying incremental tree induction to retrieval from manuals and medical texts, 588–600

White, Ryen W.
[book review], 1412–1413
a study of interface support mechanisms for interactive information retrieval, 933–948

Wiegmann, Douglas A.
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232

Wildemuth, Barbara M.
evidence-based practice in search interface design, 825–828
the open video digital library: a Möbius strip of research and practice, 1629–1643

Williams, James G.
[book review], 1979–1980

Williams, Robert V.
Harold Abbott Wooster: a memorial essay, 1974–1976

Wong, Samuel Po-Shing
documents and queries as random variables: history and implications, 1138–1154

Wu, Shengli
improving high accuracy retrieval by eliminating the uneven correlation effect in data fusion, 1962–1973

Wu, Yen-Chun Jim
technological innovation assessment of business-to-business electronic marketplaces, 1093–1104

Wu, Yi-fang Brook
finding nuggets in documents: a machine learning approach, 740–752

Xie, Hong (Iris)
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143

Xu, Yunjie (Calvin)
relevance judgment: what do information users consider beyond topicality?, 961–973
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677

Yager, Ronald R.
knowledge trees and protoforms in question-answering systems, 550–563

Yang, Changhua
translating–transliterating named entities for multilingual information access, 645–659

Yang, Christopher C.
conceptual analysis of parallel corpus collected from the Web, 632–644
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696
introduction to the special topic section on multilingual information systems, 629–631

Yang, Li
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677

Yau, Lawrence
The FedLemur Project: federated search in the real world, 347–358

Yi, Kwan
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Yoon, Yongwook
an effective procedure for constructing a hierarchical text classification system, 431–442

Zeng, Jia
a "stereo" document representation for textual information retrieval, 768–774

Zhao, Xiaoquan
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707

Zheng, Rong
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393

Zhou, Yilu
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683

Ziviani, Nivio
link-based similarity measures for the classification of Web documents, 208–221

Zuccala, Alesia
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
modeling the invisible college, 152–168

DOI: 10.1002/asi

JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Subject Index to Volume 57

ABC-Clio
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Academic Communication. *See* Scholarly Communication

Academic Disciplines
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450

Academic Institutions. *See* Universities

Academic Researchers. *See* Scholars

Acceptance Models
understanding competing application usage with the theory of planned behavior, 1338–1349

Access to Information. *See* Information Access

Accuracy of Retrieval
improving high accuracy retrieval by eliminating the uneven correlation effect in data fusion, 1962–1973

Acknowledgments
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918

ADI Collection
a "stereo" document representation for textual information retrieval, 768–774

Adolescents
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426

Advertising
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
how much of it is real? analysis of paid placement in Web search engine results, 448–461

Affective Behavior
"I'm feeling lucky": the role of emotions in seeking information on the Web, 813–818

Africa
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

Age
reflections on the age distribution of Japanese scientists, 342–346

Agents
Web navigation support by means of proximity-driven assistant agents, 515–527

AgileViews Design Framework
the open video digital library: a Möbius strip of research and practice, 1629–1643

Aging Distribution
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851

Alcohol Addiction
some comments on the use of reliability techniques [letter to the editor], 991–992

Amazon.com
utilizing a user's context to improve search results, 808–812

America Online
search in the Web shopping environment, 819–824
utilizing a user's context to improve search results, 808–812

American History
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

American Society for Information Science and Technology
ASIS to ASIS&T: a society in transition?, 1750–1757

Amsler Similarity Measure
link-based similarity measures for the classification of Web documents, 208–221

Analysis of Variance
cross-evaluation: a new model for information system evaluation, 614–628

Anonymity
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537

Anti-Semitism
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589

AntWorld
cross-evaluation: a new model for information system evaluation, 614–628

Applications Useful for Seeking Information (AUSIN)
knowledge trees and protoforms in question-answering systems, 550–563

Approximate Reasoning
knowledge trees and protoforms in question-answering systems, 550–563

Arabic
on the development of name search techniques for Arabic, 728–739
machine learning for Arabic text categorization, 1005–1010

Architecture
a qualitative feature-based characterization of 2D architectural style, 1537–1550

Archives
using rhythms of relationships to understand e-mail archives, 1936–1948

Arrowsmith Procedure
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439

Article Decay
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851

Arts and Humanities. *See also* Style Analysis
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
information arts and information science: time to unite?, 1780–1793

arXiv.org Database
earlier Web usage statistics as predictors of later citation impact, 1060–1072

ASOUNDEX
on the development of name search techniques for Arabic, 728–739

Associational Diffusion Framework
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460

Asymmetrical Citation Matrix
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Audio Signal Analysis
structural and affective aspects of music from statistical audio signal analysis, 1526–1536

Author Cocitation Analysis. *See* Citation Analysis

Authors and Authorship
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
citation rates and perceptions of scientific contribution, 169–185
comparative citation analysis of duplicate or highly related publications, 1830–1839
feature instability as a criterion for selecting potential style markers, 1519–1525
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
modeling the invisible college, 152–168
multiple authorship in a small medical journal: a case study of the *Croatian Medical Journal*, 1073–1078
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
reading and writing book reviews across the disciplines, 1194–1207
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770

Average Variance Extracted Measures
toward an understanding of Web-based subscription database acceptance, 1715–1728
Aviation Safety Program, NASA
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232
Axiology
information arts and information science: time to unite?, 1780–1793
Background Information Seeking
changing the pace of search: supporting "background" information seeking, 838–842
Bandwidth
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779
Bayes Classifier, Naive
link-based similarity measures for the classification of Web documents, 208–221
Bayesian Model
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
Behavior. *See also* Information Seeking Behavior
understanding competing application usage with the theory of planned behavior, 1338–1349
Belief Network Model
categorization-driven cross-language retrieval of medical information, 501–510
Beliefs
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
toward an understanding of Web-based subscription database acceptance, 1715–1728
Best Practices
best practices and future visions for search user interfaces, 781–787
evidence-based practice in search interface design, 825–828
search user interfaces: best practices and future visions. introduction and overview, 777–780
Bias
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Bibliographic Coupling
link-based similarity measures for the classification of Web documents, 208–221
Bibliographic Records
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032
a system for supporting evidence recording in bibliographic records, 1249–1262
Bibliometrics. *See also* Citation Analysis; Journal Analysis; Webometrics
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
a bibliometric model for journal discarding policy at academic libraries, 198–207
Bibliometrics *(Continued)*
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
on Egghe's version of continuous concentration theory, 1406–1411
identifying a better measure of relatedness for mapping science, 251–263
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
on relevance distributions, 1126–1129
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430
using the *h*-index to rank influential information scientists, 1275–1278
Bilingual Information Retrieval. *See* Cross-Language Information Retrieval
Bioarts
information arts and information science: time to unite?, 1780–1793
Biochemistry Literature. *See* Chemistry Literature
Biology. *See also* Medical Literature
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
an example of information management in biology: qualitative data economizing theory applied to the Human Genome Project databases, 244–250
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918
visualizing the scientific world and its evolution, 1461–1469
Blogs
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
Boisot's Information Space
an example of information management in biology: qualitative data economizing theory applied to the Human Genome Project databases, 244–250
Book Reviewing
reading and writing book reviews across the disciplines, 1194–1207
Book Reviews
Classifying Science: Phenomena, Data, Theory, Method, Practice (Rick Szostak), 1977–1978
CODE: Collaborative Ownership and the Digital Economy (Rishab Aiyer Ghosh), 1854–1855
Book Reviews *(Continued)*
Creating the Customer-Driven Library: Building on the Bookstore Model (Jeannette Woodward), 585–586
Creation, Use, and Deployment of Digital Information (Herre van Oostendorp, Leen Breure, and Andrew Dillon, Eds.), 1709–1710
Deflating Information: From Science Studies to Documentation (Bernd Frohmann), 1852–1853
Democratizing Innovation (Eric Von Hippel), 1711–1712
The Digital Age and Local Studies (Peter H. Reid), 443
Digital Library Use: Social Practice in Design and Evaluation (Ann Peterson Bishop, Nancy A. Van House, and Barbara P. Buttenfield, Eds.), 1130–1132
The Digital Sublime: Myth, Power, and Cyberspace (Vincent Mosco), 989–990
E-Government: From Vision to Implementation (Subhash Bhatnagar), 1280
Foundations of Library and Information Science, 2d ed. (Richard E. Rubin), 1279–1280
Indexing and Abstracting in Theory and Practice, 3d ed. (F. W. Lancaster), 144–146
Information Retrieval Design: Principles and Options for Information Description, Organization, Display, and Access in Information Retrieval Databases, Digital Libraries, Catalogs, and Indexes (James D. Anderson and José Perez-Carballo), 1412–1413
The Internet, the Web, and eBusiness: Formalizing Applications for the Real World (Kai A. Olsen), 1979–1980
Legitimate Applications of Peer-to-Peer Networks (Dinesh C. Verma), 293–294
Link Analysis: An Information Science Approach, 1855–1858
Protocol: How Control Exists after Decentralization (Alexander R. Galloway), 146–147
Putting XML to Work in the Library: Tools for Improving Access and Management (Dick R. Miller and Kevin S. Clarke), 294–295
Qualitative Research for the Information Professional: A Practical Handbook (G. E. Gorman and Peter Clayton), 1708–1709
A Semantic Web Primer (Grigoris Antoniou and Frank van Harmelen), 1132
Shaping the Network Society: The New Role of Civil Society in Cyberspace (Douglas Schuler and Peter Day, Eds.), 724–725
Social Capital and Information Technology (Marleen Huysman and Volker Wulf, Eds.), 723–724
Understanding Digital Libraries, 2d ed. (Michael Lesk), 844–846
The Virtual Reference Experience: Integrating Theory into Practice (R. David Lankes, et al., Eds.), 843–844
Web Site Design with the Patron in Mind: A Step-by-Step Guide for Libraries (Susanna Davidsen and Everyl Yankee), 444–445
Books
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022

reading and writing book reviews across the disciplines, 1194–1207

Bradford's Law of Scattering
classification and powerlaws: the logarithmic transformation, 1470–1486

Broad Exploration
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450

Browsing
improving Internet interaction: from theory to practice, 829–833
relevance for browsing, relevance for searching, 69–86

Building Plans
a qualitative feature-based characterization of 2D architectural style, 1537–1550

Bush, Vannevar
Memex at 60: Internet or iPod?, 1233–1242

Business and Businesses. ***See also*** **E-Commerce**
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829
factors governing the consumption of explicit knowledge, 36–43
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
technological innovation assessment of business-to-business electronic marketplaces, 1093–1104

Business Simulations
the effect of source nature and status on the subjective value of information, 321–329

Call Centers
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829

Canada
visualizing linguistic and cultural differences using Web co-link data, 1178–1193

Capability Development Process
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829

Carnegie Mellon University
The FedLemur Project: federated search in the real world, 347–358

Case New Holland (CNH)
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143

Cataloging
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032
a system for supporting evidence recording in bibliographic records, 1249–1262

Categorization. ***See*** **Classification**

Cell **(journal)**
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918

Cellular Phones. ***See*** **Mobile Devices**

Celtic Patterns
modal relationships as stylistic features: examples from Seljuk and Celtic patterns, 1551–1560

Central Limit Theorem
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430

Cepstral Analysis
structural and affective aspects of music from statistical audio signal analysis, 1526–1536

Change
technology, genres, and value change: the case of little magazines, 862–872

Chat Reference Service
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059

Chemistry Literature
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430

Chi Square Test
exploiting the Web as the multilingual corpus for unknown query translation, 660–670

China
evaluating China's university library Web sites using correspondence analysis, 493–500
reflections on the age distribution of Japanese scientists, 342–346

Chinese
automatic thesaurus development: term extraction from title metadata, 907–920
conceptual analysis of parallel corpus collected from the Web, 632–644
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696
a lexical knowledge base approach for English–Chinese cross-language information retrieval, 233–243
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683

Chinese Classification Thesaurus
automatic thesaurus development: term extraction from title metadata, 907–920

Citation Analysis. ***See also*** **Journal Analysis**
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502

Citation Analysis *(Continued)*
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
citation rates and perceptions of scientific contribution, 169–185
CiteSpace II: detecting and visualizing emerging trends and transient patterns in scientific literature, 359–377
classification and powerlaws: the logarithmic transformation, 1470–1486
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
comparative citation analysis of duplicate or highly related publications, 1830–1839
the diffusion of theories: a functional approach, 330–341
earlier Web usage statistics as predictors of later citation impact, 1060–1072
identifying a better measure of relatedness for mapping science, 251–263
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
interpreting social science link analysis research: a theoretical framework, 60–68
measuring the utility of journals in the crime-psychology field: beyond the impact factor, 1804–1813
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430
using the *h*-index to rank influential information scientists, 1275–1278
visualizing the scientific world and its evolution, 1461–1469

Citation Context Analysis
the diffusion of theories: a functional approach, 330–341

Citation Indexes
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
comparative citation analysis of duplicate or highly related publications, 1830–1839
timelines in citation research, 1404–1405
visualizing the scientific world and its evolution, 1461–1469

Citebase
earlier Web usage statistics as predictors of later citation impact, 1060–1072

CiteSpace II
CiteSpace II: detecting and visualizing emerging trends and transient patterns in scientific literature, 359–377

Clarity Retrieval System
which user interaction for cross-language information retrieval? design issues and reflections, 709–722

Classification
automated judgment of document qualities, 1155–1164

DOI: 10.1002/asi

Classification *(Continued)*
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
categorization-driven cross-language retrieval of medical information, 501–510
classification and powerlaws: the logarithmic transformation, 1470–1486
an effective procedure for constructing a hierarchical text classification system, 431–442
extracting link chains of relationship instances from a Web site, 1590–1605
feature instability as a criterion for selecting potential style markers, 1519–1525
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
intellectual property information: a comparative analysis of main information providers, 1794–1803
learning to classify documents according to genre, 1506–1518
link-based similarity measures for the classification of Web documents, 208–221
machine learning for Arabic text categorization, 1005–1010
measuring online information seeking context, part 2: findings and discussion, 1862–1874
a qualitative feature-based characterization of 2D architectural style, 1537–1550
Web unit-based mining of homepage relationships, 394–407

Clustering
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707
image clustering for the exploration of video sequences, 577–584
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460
using rhythms of relationships to understand e-mail archives, 1936–1948
visualizing the scientific world and its evolution, 1461–1469
Web navigation support by means of proximity-driven assistant agents, 515–527
Web searching on the Vivisimo search engine, 1875–1887

Co-citation Analysis. ***See*** **Citation Analysis**

Co-occurrence. ***See*** **Term Co-occurrence**

Coauthorship. ***See*** **Multiple Authorship**

Cocitation Similarity Measure
link-based similarity measures for the classification of Web documents, 208–221

Cognition
human information behavior: integrating diverse approaches and information use, 25–35

Cognition *(Continued)*
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143

Cohesiveness of Literature
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439

Collaboration
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895
learning and knowledge networks in interdisciplinary collaborations, 1079–1092
modeling the invisible college, 152–168
the role of the Internet in informal scholarly communication, 1350–1367
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918
using rhythms of relationships to understand e-mail archives, 1936–1948
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770

Collaborative Information Synthesis Model
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895

Collection Management
a bibliometric model for journal discarding policy at academic libraries, 198–207

Communication
the diffusion of theories: a functional approach, 330–341
e-mail interviewing in qualitative research: a methodological discussion, 1284–1295
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
the role of the Internet in informal scholarly communication, 1350–1367
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

Communication Networks
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
modeling the invisible college, 152–168

Deep Log Analysis
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
Delayed Web Searching
changing the pace of search: supporting "background" information seeking, 838–842
Demographic Factors
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
Dempster-Shafer Belief Structures
knowledge trees and protoforms in question-answering systems, 550–563
Denial of Service
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779
Dentists
work roles, tasks, and the information behavior of dentists, 1896–1908

DOI: 10.1002/asi

Descriptive Metadata
a system for supporting evidence recording in bibliographic records, 1249–1262

Design
best practices and future visions for search user interfaces, 781–787
designing a search user interface for a digital library, 788–791
do-it-yourself information technology: role hybridization and the design—use interface, 87–95
evidence-based practice in search interface design, 825–828
"I'm feeling lucky": the role of emotions in seeking information on the Web, 813–818
information arts and information science: time to unite?, 1780–1793
the open video digital library: a Möbius strip of research and practice, 1629–1643
a qualitative feature-based characterization of 2D architectural style, 1537–1550
search in the Web shopping environment, 819–824
search on mobile phones, 834–837
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143
utilizing a user's context to improve search results, 808–812
which user interaction for cross-language information retrieval? design issues and reflections, 709–722

Developing Nations
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
Web issue analysis: an integrated water resource management case study, 1303–1314

Diagrams
a qualitative feature-based characterization of 2D architectural style, 1537–1550

DIALOG
intellectual property information: a comparative analysis of main information providers, 1794–1803

Diffusion of Innovation
the diffusion of theories: a functional approach, 330–341
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460

Digital Learning Objects
building interoperable vocabulary and structures for learning objects, 280–292

Digital Libraries
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
designing a search user interface for a digital library, 788–791
exploiting the Web as the multilingual corpus for unknown query translation, 660–670
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
the open video digital library: a Möbius strip of research and practice, 1629–1643
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143

Digital Library for Earth System Education (DLESE)
designing a search user interface for a digital library, 788–791

Disambiguation
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)

Discarding Journals. *See* Collection Management

Disciplines
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450

Discussion Lists
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
productivity in the Internet mailing lists: a bibliometric analysis, 51–59

Disjointed Incrementalism
"irrational" searchers and IR-rational researchers, 222–232

Display of Bibliographic Entities
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032

Display of Search Results. *See* Search Results; User Interfaces

Dissimilarity Measures
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Distance-Based Classifier
machine learning for Arabic text categorization, 1005–1010

Distance Education
interaction in distance-learning courses, 299–305

Distributed Information Retrieval

the effect of source nature and status on the subjective value of information, 321–329

Engineering
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004

English
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
conceptual analysis of parallel corpus collected from the Web, 632–644
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696
a lexical knowledge base approach for English–Chinese cross-language information retrieval, 233–243
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
user experiments with the Eurovision cross-language image retrieval system, 697–708
visualizing linguistic and cultural differences using Web co-link data, 1178–1193

Environmental Health
relevance criteria identified by health information users during Web searches, 1368–1382

Equality
the numerical equivalence between the impact factor of journals and the quality of the articles [letter to the editor], 1561

Error in Predictors
documents and queries as random variables: history and implications, 1138–1154

Errors
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232

Esp@cenet
intellectual property information: a comparative analysis of main information providers, 1794–1803

Ethics
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779

Ethiopia
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

Europe
the role of the Internet in informal scholarly communication, 1350–1367

European Patent Office
intellectual property information: a comparative analysis of main information providers, 1794–1803

Eurovision
user experiments with the Eurovision cross-language image retrieval system, 697–708

Evaluation Methods
cross-evaluation: a new model for information system evaluation, 614–628
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325

Event Spaces
documents and queries as random variables: history and implications, 1138–1154

Evidence-Based Practice
evidence-based practice in search interface design, 825–828

Evidence Recording
a system for supporting evidence recording in bibliographic records, 1249–1262

Evolutionary Psychology
human information behavior: integrating diverse approaches and information use, 25–35

Exosomatic Information
fundamental forms of information, 1033–1045

Experimental Searching and Browsing Interface (ESBI)
user preference: a measure of query-term quality, 1566–1580

Expert Knowledge
the effect of source nature and status on the subjective value of information, 321–329
modeling the invisible college, 152–168
strategy hubs: domain portals to help find comprehensive information, 4–24

Exponential Distribution
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177

Extraction. ***See*** **Information Extraction; Term Extraction**

Eye Disorders
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

Factor Analysis
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
classification and powerlaws: the logarithmic transformation, 1470–1486
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677

Familiarity Rating
structural and affective aspects of music from statistical audio signal analysis, 1526–1536

FedLemur Project
The FedLemur Project: federated search in the real world, 347–358

Filtering
a decision theoretic approach to combining information filters: an analytical and empirical evaluation, 306–320
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696
learning to classify documents according to genre, 1506–1518

FindWhat
how much of it is real? analysis of paid placement in Web search engine results, 448–461

fKWIC
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615

***Flatland: A Romance of Many Dimensions* (Abbott)**
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032

Fractal Theory
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696

Frankenscience Words
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337

French
categorization-driven cross-language retrieval of medical information, 501–510
visualizing linguistic and cultural differences using Web co-link data, 1178–1193

Frequency-Based Keyword-in-Context Index
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615

Frequency Distributions
classification and powerlaws: the logarithmic transformation, 1470–1486
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
reflections on the age distribution of Japanese scientists, 342–346
relevance criteria identified by health information users during Web searches, 1368–1382

DOI: 10.1002/asi

Frequency Distributions *(Continued)*
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430
***Functional Requirements for Bibliographic Records* (IFLA)**
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032
Fuzzy Interrelations and Synonymy-Based Concept Representation Model (FIS-CRM)
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
Fuzzy Set Theory
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537
knowledge trees and protoforms in question-answering systems, 550–563
soft approaches to information retrieval and information access on the Web: an introduction to the special topic section, 511–514
Web navigation support by means of proximity-driven assistant agents, 515–527
Galileo System
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460
GAMBAL for the Exploration of Video Sequences
image clustering for the exploration of video sequences, 577–584
Gap-Bridging
information use as gap-bridging: the viewpoint of sense-making methodology, 1116–1125
Garfield's Law of Concentration
classification and powerlaws: the logarithmic transformation, 1470–1486
GenBank. ***See*** **Genomic Databases**
Gender
gender and Web information seeking: a self-concept orientation model, 1105–1115
General Linear Model Analysis
cross-evaluation: a new model for information system evaluation, 614–628
Generalized Inverse Poisson-Gaussian Distribution
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
Genetic Information
fundamental forms of information, 1033–1045
Genomic Databases
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
an example of information management in biology: qualitative data economizing theory applied to the Human Genome Project databases, 244–250
Genres
learning to classify documents according to genre, 1506–1518
technology, genres, and value change: the case of little magazines, 862–872
Geographic Distribution of Research Centers
the scientific network of surfactants: structural analysis, 949–960
Global Economy
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
Google
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589
Google Scholar Search Engine
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
Googlebombing
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589
Government
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
Government Information
The FedLemur Project: federated search in the real world, 347–358
Graduate Students
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450
measuring online information seeking context, part 1: background and method, 1729–1739
measuring online information seeking context, part 2: findings and discussion, 1862–1874
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
Graph Theory
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
Graphical Representation
a qualitative feature-based characterization of 2D architectural style, 1537–1550
Green Award
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059
Grice's Theory of Communication
relevance judgment: what do information users consider beyond topicality?, 961–973
Guided Searches
dynamic taxonomies and guided searches, 792–796
improving Internet interaction: from theory to practice, 829–833
a study of interface support mechanisms for interactive information retrieval, 933–948
***h*-Index**
using the *h*-index to rank influential information scientists, 1275–1278
Half-Life of Citations
timelines in citation research, 1404–1405
Handheld Devices. ***See*** **Mobile Devices**
Health Care Delivery
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393
Health Information. ***See also*** **Medical Literature**
categorization-driven cross-language retrieval of medical information, 501–510
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
the influence of structural and message features on Web site credibility, 114–127
relevance criteria identified by health information users during Web searches, 1368–1382
strategy hubs: domain portals to help find comprehensive information, 4–24
Hierarchical Classification System
an effective procedure for constructing a hierarchical text classification system, 431–442
Hierarchical Relationships
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177
High Energy Physics
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770
HiMeD Model
categorization-driven cross-language retrieval of medical information, 501–510
History
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220
History of Information Science
Memex at 60: Internet or iPod?, 1233–1242
History of the English Language (HEL-L)
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
Homepages. ***See*** **Web Pages and Web Sites**
Hong Kong
conceptual analysis of parallel corpus collected from the Web, 632–644
Hormone Therapy
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
Human-Computer Interaction
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
Human Errors
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232

DOI: 10.1002/asi

Human Genome Project. ***See*** **Genomic Databases**
Human–Computer Interaction
interaction in distance-learning courses, 299–305
a study of interface support mechanisms for interactive information retrieval, 933–948
Humanities
arts and humanities literature: bibliometric characteristics of contributions by Turkish authors, 1011–1022
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
Hybrid Word Families
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
Hybridization
do-it-yourself information technology: role hybridization and the design—use interface, 87–95
Hyperauthorship. ***See*** **Multiple Authorship**
Hyperlinks. ***See*** **Links and Link Analysis**
Hypothesis Projection
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
Ideas
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
Identity
on the development of name search techniques for Arabic, 728–739
Images
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707
image clustering for the exploration of video sequences, 577–584
translating–transliterating named entities for multilingual information access, 645–659
Impact Factors
comparative citation analysis of duplicate or highly related publications, 1830–1839
earlier Web usage statistics as predictors of later citation impact, 1060–1072
measuring the utility of journals in the crime-psychology field: beyond the impact factor, 1804–1813
the numerical equivalence between the impact factor of journals and the quality of the articles [letter to the editor], 1561
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
using the *h*-index to rank influential information scientists, 1275–1278
Incremental Tree Induction Algorithm
applying incremental tree induction to retrieval from manuals and medical texts, 588–600
Index Terms. ***See also*** **Search Terms; Thesauri**
automatic thesaurus development: term extraction from title metadata, 907–920
Index Terms *(Continued)*
finding nuggets in documents: a machine learning approach, 740–752
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
user preference: a measure of query-term quality, 1566–1580
Indexes and Indexing. ***See also*** **Citation Indexes**
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
finding nuggets in documents: a machine learning approach, 740–752
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Indirect Connections
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
Individual Contribution. ***See*** **Scientific Contribution**
Inference
knowledge trees and protoforms in question-answering systems, 550–563
Information
the effect of source nature and status on the subjective value of information, 321–329
fundamental forms of information, 1033–1045
the influence of structural and message features on Web site credibility, 114–127
Information Access
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
Information Arts
information arts and information science: time to unite?, 1780–1793
Information Extraction
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
extracting link chains of relationship instances from a Web site, 1590–1605
Information Filtering. ***See*** **Filtering**
Information Flow Lineages
fundamental forms of information, 1033–1045
Information Quality
automated judgment of document qualities, 1155–1164
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
Information Quality *(Continued)*
the numerical equivalence between the impact factor of journals and the quality of the articles [letter to the editor], 1561
Information Rate
structural and affective aspects of music from statistical audio signal analysis, 1526–1536
Information Retrieval. ***See also*** **Cross-Language Information Retrieval; Information Seeking Behavior; User Interfaces; Web Searching**
automated judgment of document qualities, 1155–1164
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450
building a reusable test collection for question answering, 851–861
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
documents and queries as random variables: history and implications, 1138–1154
knowledge trees and protoforms in question-answering systems, 550–563
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
relevance for browsing, relevance for searching, 69–86
search histories for user support in user interfaces, 803–807
soft approaches to information retrieval and information access on the Web: an introduction to the special topic section, 511–514
user preference: a measure of query-term quality, 1566–1580
Information Retrieval Systems. ***See also*** **Information Systems**
applying incremental tree induction to retrieval from manuals and medical texts, 588–600
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
cross-evaluation: a new model for information system evaluation, 614–628
improving high accuracy retrieval by eliminating the uneven correlation effect in data fusion, 1962–1973
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
relevance criteria identified by health information users during Web searches, 1368–1382
a "stereo" document representation for textual information retrieval, 768–774
a study of interface support mechanisms for interactive information retrieval, 933–948
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

DOI: 10.1002/asi

Information Science
ASIS to ASIS&T: a society in transition?, 1750–1757
classification and powerlaws: the logarithmic transformation, 1470–1486
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
fundamental forms of information, 1033–1045
information arts and information science: time to unite?, 1780–1793
Memex at 60: Internet or iPod?, 1233–1242

Information Scientists
using the *h*-index to rank influential information scientists, 1275–1278

Information Seeking Behavior
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450
changing the pace of search: supporting "background" information seeking, 838–842
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
evidence-based practice in search interface design, 825–828
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
gender and Web information seeking: a self-concept orientation model, 1105–1115
human information behavior: integrating diverse approaches and information use, 25–35
"I'm feeling lucky": the role of emotions in seeking information on the Web, 813–818
improving Internet interaction: from theory to practice, 829–833
"irrational" searchers and IR-rational researchers, 222–232
measuring online information seeking context, part 1: background and method, 1729–1739
measuring online information seeking context, part 2: findings and discussion, 1862–1874
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
reconciling information-seeking behavior with search user interfaces for the Web, 797–799
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
search histories for user support in user interfaces, 803–807
search in the Web shopping environment, 819–824
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426
user preference: a measure of query-term quality, 1566–1580

Information Seeking Behavior *(Continued)*
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220
utilizing a user's context to improve search results, 808–812
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677
work roles, tasks, and the information behavior of dentists, 1896–1908
workspaces for search, 800–802

Information Space
an example of information management in biology: qualitative data economizing theory applied to the Human Genome Project databases, 244–250

Information Structure Model
a decision theoretic approach to combining information filters: an analytical and empirical evaluation, 306–320

Information Systems
the effect of source nature and status on the subjective value of information, 321–329
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
understanding competing application usage with the theory of planned behavior, 1338–1349

Information Technology
do-it-yourself information technology: role hybridization and the design—use interface, 87–95
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
technology, genres, and value change: the case of little magazines, 862–872

Information Use
factors governing the consumption of explicit knowledge, 36–43
human information behavior: integrating diverse approaches and information use, 25–35
information use as gap-bridging: the viewpoint of sense-making methodology, 1116–1125

Information Use Environment
modeling the invisible college, 152–168

Information Visualization
CiteSpace II: detecting and visualizing emerging trends and transient patterns in scientific literature, 359–377
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
identifying a better measure of relatedness for mapping science, 251–263
using rhythms of relationships to understand e-mail archives, 1936–1948
visualizing linguistic and cultural differences using Web co-link data, 1178–1193
visualizing the scientific world and its evolution, 1461–1469

Informetrics. ***See also*** **Bibliometrics; Webometrics**
on Egghe's version of continuous concentration theory, 1406–1411
productivity in the Internet mailing lists: a bibliometric analysis, 51–59

Informetrics (*Continued***)**
on relevance distributions, 1126–1129

Innovation
the diffusion of theories: a functional approach, 330–341
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
factors governing the consumption of explicit knowledge, 36–43
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
technological innovation assessment of business-to-business electronic marketplaces, 1093–1104
technology clusters: using multidimensional scaling to evaluate and structure technology clusters, 1451–1460

Instant Messaging
understanding competing application usage with the theory of planned behavior, 1338–1349

Intellectual Bases
CiteSpace II: detecting and visualizing emerging trends and transient patterns in scientific literature, 359–377

Intellectual Property
intellectual property information: a comparative analysis of main information providers, 1794–1803

Intention
understanding competing application usage with the theory of planned behavior, 1338–1349

Interaction
automated judgment of document qualities, 1155–1164
interaction in distance-learning courses, 299–305
a study of interface support mechanisms for interactive information retrieval, 933–948

Interdisciplinary Research
learning and knowledge networks in interdisciplinary collaborations, 1079–1092

Interfaces. ***See*** **User Interfaces**

International Conference on Information Systems (ICIS)
information systems citation patterns from International Conference on Information Systems articles, 1263–1274

International Federation of Library Associations and Institutions (IFLA)
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032

International Patent Classification
intellectual property information: a comparative analysis of main information providers, 1794–1803

Internet. ***See also*** **Web Pages and Web Sites; World Wide Web**
Memex at 60: Internet or iPod?, 1233–1242
the role of the Internet in informal scholarly communication, 1350–1367
work roles, tasks, and the information behavior of dentists, 1896–1908

Internet Bandwidth
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779

DOI: 10.1002/asi

Internet Mailing Lists. ***See*** **Mailing Lists**
Internet Shopping. ***See*** **E-Commerce**
Interpersonal Communication
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059
Interviewing
e-mail interviewing in qualitative research: a methodological discussion, 1284–1295
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059
Inverted Index System
applying incremental tree induction to retrieval from manuals and medical texts, 588–600
Invisible College
modeling the invisible college, 152–168
iPod Model
Memex at 60: Internet or iPod?, 1233–1242
Issue Tracking
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654
ixquick
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Jaccard Index
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177
Japan
reflections on the age distribution of Japanese scientists, 342–346
Japanese
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
Jew Watch Homepage
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589
Journal Analysis. ***See also*** **Bibliometrics; Citation Analysis**
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
a bibliometric model for journal discarding policy at academic libraries, 198–207
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
measuring the utility of journals in the crime-psychology field: beyond the impact factor, 1804–1813
multiple authorship in a small medical journal: a case study of the *Croatian Medical Journal*, 1073–1078
the place of serials in referencing practices: comparing natural sciences and engineering with social sciences and humanities, 997–1004
Journal Analysis *(Continued)*
timelines in citation research, 1404–1405
Journal Citation Reports
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613
timelines in citation research, 1404–1405
Journal Collections
a bibliometric model for journal discarding policy at academic libraries, 198–207
Journal Descriptor Indexing (JDI)
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Journal Impact Factors. ***See*** **Impact Factors**
Journal of the American Chemical Society
classification and powerlaws: the logarithmic transformation, 1470–1486
Journal Productivity

Judgment
relevance criteria identified by health information users during Web searches, 1368–1382
relevance judgment: what do information users consider beyond topicality?, 961–973
Keyphrase Identification Program (KIP)
finding nuggets in documents: a machine learning approach, 740–752
Keyword-in-Context Index
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
Kinematic Models for Design Digital Library (KMODDL)
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
***k*NN Classifier**
link-based similarity measures for the classification of Web documents, 208–221
Knowledge Discovery
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
visualizing the scientific world and its evolution, 1461–1469
Knowledge Domains
visualizing the scientific world and its evolution, 1461–1469
Knowledge Exchange
learning and knowledge networks in interdisciplinary collaborations, 1079–1092
Knowledge Production
factors governing the consumption of explicit knowledge, 36–43
the role of the Internet in informal scholarly communication, 1350–1367
the scientific network of surfactants: structural analysis, 949–960
Knowledge Trees
knowledge trees and protoforms in question-answering systems, 550–563
Knowledge Utilization
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829
factors governing the consumption of explicit knowledge, 36–43
Knowledge Utilization *(Continued)*
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
Language and Languages. ***See also*** **Cross-Language Information Retrieval**
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
automatic thesaurus development: term extraction from title metadata, 907–920
conceptual analysis of parallel corpus collected from the Web, 632–644
on the development of name search techniques for Arabic, 728–739
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
the impact analysis of language differences on an automatic multilingual text summarization system, 684–696
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
a lexical knowledge base approach for English–Chinese cross-language information retrieval, 233–243
machine learning for Arabic text categorization, 1005–1010
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
visualizing linguistic and cultural differences using Web co-link data, 1178–1193
Language Models
documents and queries as random variables: history and implications, 1138–1154
Latent Semantic Analysis
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767
Latent Semantic Indexing
a "stereo" document representation for textual information retrieval, 768–774
Learning
building interoperable vocabulary and structures for learning objects, 280–292
interaction in distance-learning courses, 299–305
learning and knowledge networks in interdisciplinary collaborations, 1079–1092
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
Learning Algorithms
extracting link chains of relationship instances from a Web site, 1590–1605
Legal Information
search histories for user support in user interfaces, 803–807
Leimkuhler Curve
on Egghe's version of continuous concentration theory, 1406–1411
Lemur Toolkit
The FedLemur Project: federated search in the real world, 347–358
Lexical Analysis
conceptual analysis of parallel corpus collected from the Web, 632–644

DOI: 10.1002/asi

Lexical Knowledge Base
exploiting the Web as the multilingual corpus for unknown query translation, 660–670
a lexical knowledge base approach for English–Chinese cross-language information retrieval, 233–243

Libraries and Librarians. *See also* Digital Libraries
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248

evaluating China's university library Web sites using correspondence analysis, 493–500
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143

Life Information Needs
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426

Linear Statistical Models
classification and powerlaws: the logarithmic transformation, 1470–1486

LINGUIST
productivity in the Internet mailing lists: a bibliometric analysis, 51–59

Linguistics
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
feature instability as a criterion for selecting potential style markers, 1519–1525
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
visualizing linguistic and cultural differences using Web co-link data, 1178–1193

Links and Link Analysis
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
extracting link chains of relationship instances from a Web site, 1590–1605
interpreting social science link analysis research: a theoretical framework, 60–68
link-based similarity measures for the classification of Web documents, 208–221
visualizing linguistic and cultural differences using Web co-link data, 1178–1193
Web issue analysis: an integrated water resource management case study, 1303–1314
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589

LISREL VIII Framework
understanding consumer trust in Internet shopping: a multidisciplinary approach, 479–492

Literature-Based Discovery
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439

Little Magazines
technology, genres, and value change: the case of little magazines, 862–872

Log Analysis. *See* Deep Log Analysis; Web Transaction Log Analysis

Logarithmic Transformation
classification and powerlaws: the logarithmic transformation, 1470–1486

Longitudinal Research
measuring online information seeking context, part 1: background and method, 1729–1739
measuring online information seeking context, part 2: findings and discussion, 1862–1874

Lorenz Concentration Theory
on Egghe's version of continuous concentration theory, 1406–1411
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177

Lotka Power Function
productivity in the Internet mailing lists: a bibliometric analysis, 51–59

Machine Learning
applying incremental tree induction to retrieval from manuals and medical texts, 588–600
finding nuggets in documents: a machine learning approach, 740–752
machine learning for Arabic text categorization, 1005–1010

Machine Translation. *See also* Translation
conceptual analysis of parallel corpus collected from the Web, 632–644
feature instability as a criterion for selecting potential style markers, 1519–1525

Magazines
technology, genres, and value change: the case of little magazines, 862–872

Mailing Lists
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
productivity in the Internet mailing lists: a bibliometric analysis, 51–59

Majority Guided Linguistic Induced Ordered Weighted Average (MLIOWA)
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549

Mamma
how much of it is real? analysis of paid placement in Web search engine results, 448–461

Maps
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
the scientific network of surfactants: structural analysis, 949–960
visualizing the scientific world and its evolution, 1461–1469

Marketing
evaluating China's university library Web sites using correspondence analysis, 493–500
toward an understanding of Web-based subscription database acceptance, 1715–1728

Maryland AskUsNow! Chat Reference Service
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059

Mathematics
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502

Matrices
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Maximum Likelihood
documents and queries as random variables: history and implications, 1138–1154

Medical Care
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

Medical Information. *See* Health Information

Medical Literature
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988
multiple authorship in a small medical journal: a case study of the *Croatian Medical Journal*, 1073–1078
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430
visualizing the scientific world and its evolution, 1461–1469

Medical Research
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918

Medical Subject Headings (MeSH)
categorization-driven cross-language retrieval of medical information, 501–510
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439

Medical Text Indexer (MTI)
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)

MEDLINE
categorization-driven cross-language retrieval of medical information, 501–510

DOI: 10.1002/asi

MEDLINE *(Continued)*
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)

Memex
Memex at 60: Internet or iPod?, 1233–1242

Menopause
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988

Message Features
the influence of structural and message features on Web site credibility, 114–127

Metadata
automatic thesaurus development: term extraction from title metadata, 907–920
building interoperable vocabulary and structures for learning objects, 280–292
relevance criteria identified by health information users during Web searches, 1368–1382
a system for supporting evidence recording in bibliographic records, 1249–1262

MetaMap System, National Library of Medicine
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)

Minimum Spanning Trees
visualizing the scientific world and its evolution, 1461–1469

Mitsukeru System
improving Internet interaction: from theory to practice, 829–833

Mobile Devices
best practices and future visions for search user interfaces, 781–787
changing the pace of search: supporting "background" information seeking, 838–842
search on mobile phones, 834–837
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890

Modal Relationships
modal relationships as stylistic features: examples from Seljuk and Celtic patterns, 1551–1560

Models and Modeling
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
a bibliometric model for journal discarding policy at academic libraries, 198–207
categorization-driven cross-language retrieval of medical information, 501–510
cross-evaluation: a new model for information system evaluation, 614–628
a decision theoretic approach to combining information filters: an analytical and empirical evaluation, 306–320
the diffusion of theories: a functional approach, 330–341
documents and queries as random variables: history and implications, 1138–1154
gender and Web information seeking: a self-concept orientation model, 1105–1115

Models and Modeling *(Continued)*
human information behavior: integrating diverse approaches and information use, 25–35
modeling successful performance in Web searching, 1678–1693
modeling the invisible college, 152–168
moderating information and communication technologies' influences on socioeconomic development with good governance: a study of the developing countries, 186–197
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
relevance for browsing, relevance for searching, 69–86
relevance judgment: what do information users consider beyond topicality?, 961–973
a "stereo" document representation for textual information retrieval, 768–774
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426
toward an understanding of Web-based subscription database acceptance, 1715–1728
understanding competing application usage with the theory of planned behavior, 1338–1349

Modular Cognitive Architecture
human information behavior: integrating diverse approaches and information use, 25–35

the scientific network of surfactants: structural analysis, 949–960

Neural-Cultural Information
fundamental forms of information, 1033–1045

Newsgroups
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393

Newspapers
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767

Nonmonotonic Possibilistic Propositions
knowledge trees and protoforms in question-answering systems, 550–563

Novelty
relevance judgment: what do information users consider beyond topicality?, 961–973

Novice Searchers
modeling successful performance in Web searching, 1678–1693

Obituaries
Harold Abbott Wooster: a memorial essay, 1974–1976

Obsolescence
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851

OhioLINK (Ohio Library and Information Network)
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851

OHSUMED Test Collection
categorization-driven cross-language retrieval of medical information, 501–510

Online Computer Library Center (OCLC)
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032

Online Public Access Catalogs
multiple-version resources in digital libraries: towards user-centered displays, 1023–1032

Ontologies. *See also* Taxonomies
building interoperable vocabulary and structures for learning objects, 280–292
extracting link chains of relationship instances from a Web site, 1590–1605

Open Video Digital Library (OVDL)
the open video digital library: a Möbius strip of research and practice, 1629–1643

Ophthalmology
telemedicine in sub-Saharan Africa: the case of teleophthalmology and eye care in Ethiopia, 1383–1393

Order of Information Sources
strategy hubs: domain portals to help find comprehensive information, 4–24

Ordinal Fuzzy Linguistic Approach
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549

Organizations
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829
factors governing the consumption of explicit knowledge, 36–43
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279

Orthography
on the development of name search techniques for Arabic, 728–739

Overlap
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177

Overture
how much of it is real? analysis of paid placement in Web search engine results, 448–461

OVID Interface to CAB Abstracts
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478

Paid Placement
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
how much of it is real? analysis of paid placement in Web search engine results, 448–461

Pajek Visualization Software
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Pareto Distributions, Truncated
on Egghe's version of continuous concentration theory, 1406–1411

Patents
intellectual property information: a comparative analysis of main information providers, 1794–1803
technological innovation assessment of business-to-business electronic marketplaces, 1093–1104

Pearson Correlation Coefficient
classification and powerlaws: the logarithmic transformation, 1470–1486
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
identifying a better measure of relatedness for mapping science, 251–263

Peer-to-Peer Systems
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537

Pennsylvania Gazette
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767

Perceived Usefulness
toward an understanding of Web-based subscription database acceptance, 1715–1728

Performance
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935

Person-in-Situation Model
measuring online information seeking context, part 1: background and method, 1729–1739

Personal Information Management Systems
Memex at 60: Internet or iPod?, 1233–1242

Personal Preferences
automated judgment of document qualities, 1155–1164

Personality
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450

Phonetic Matching Algorithms
on the development of name search techniques for Arabic, 728–739

Physicists
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770

Physics Literature
earlier Web usage statistics as predictors of later citation impact, 1060–1072
visualizing the scientific world and its evolution, 1461–1469

Plan Recognition
a qualitative feature-based characterization of 2D architectural style, 1537–1550

Planned Behavior Theory
understanding competing application usage with the theory of planned behavior, 1338–1349

Poisson-Lognormal Distribution
productivity in the Internet mailing lists: a bibliometric analysis, 51–59

Portals. *See* Web Portals

Portuguese
categorization-driven cross-language retrieval of medical information, 501–510

Positioning (Marketing)
evaluating China's university library Web sites using correspondence analysis, 493–500

Power Law Distribution
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
relevance criteria identified by health information users during Web searches, 1368–1382

Power Laws
classification and powerlaws: the logarithmic transformation, 1470–1486
properties of the n-overlap vector and n-overlap similarity theory, 1165–1177

Precision
improving high accuracy retrieval by eliminating the uneven correlation effect in data fusion, 1962–1973

Principal Component Analysis
can scientific journals be classified in terms of aggregated journal-journal citation relations using the *Journal Citation Reports*?, 601–613

Privacy
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779

DOI: 10.1002/asi

Probabalistic Latent Semantic Analysis
probabilistic topic decomposition of an eighteenth-century American newspaper, 753–767

Probabilistic Models
documents and queries as random variables: history and implications, 1138–1154

Problem Solving
human information behavior: integrating diverse approaches and information use, 25–35

Problematic Situation
measuring online information seeking context, part 1: background and method, 1729–1739

Procedural Search Knowledge
strategy hubs: domain portals to help find comprehensive information, 4–24

Proceedings
information systems citation patterns from International Conference on Information Systems articles, 1263–1274

Productivity. *See also* Journal Productivity
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
the role of the Internet in informal scholarly communication, 1350–1367

Project COUNTER
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248

Promotion. *See* Marketing

Protein Databank
diffusion pattern of the use of genomic databases and analysis of biological sequences from 1970–2003: bibliographic record analysis of 12 journals, 44–50
an example of information management in biology: qualitative data economizing theory applied to the Human Genome Project databases, 244–250

Protoforms
knowledge trees and protoforms in question-answering systems, 550–563

Proximity-Based Fuzzy C-Means (P-FCM) Algorithm
Web navigation support by means of proximity-driven assistant agents, 515–527

PsychINFO
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Psychology
human information behavior: integrating diverse approaches and information use, 25–35

Psychology Literature
article decay in the digital environment: an analysis of usage of OhioLINK by date of publication, employing deep log methods, 1840–1851
measuring the utility of journals in the crime-psychology field: beyond the impact factor, 1804–1813

Public Health
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749

Public Health *(Continued)*
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895

Public Opinion
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654

Publishing
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549

Quality of Information
automated judgment of document qualities, 1155–1164
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
the numerical equivalence between the impact factor of journals and the quality of the articles [letter to the editor], 1561

Queries
changing the pace of search: supporting "background" information seeking, 838–842
documents and queries as random variables: history and implications, 1138–1154
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890

Query Expansion
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478

Query Formulation
best practices and future visions for search user interfaces, 781–787
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450
how much of it is real? analysis of paid placement in Web search engine results, 448–461
"irrational" searchers and IR-rational researchers, 222–232
modeling successful performance in Web searching, 1678–1693
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
reconciling information-seeking behavior with search user interfaces for the Web, 797–799
a reference model for user-system interaction in thesaurus-based searching, 1655–1665
strategy hubs: domain portals to help find comprehensive information, 4–24
a study of interface support mechanisms for interactive information retrieval, 933–948
user preference: a measure of query-term quality, 1566–1580
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Query Formulation *(Continued)*
Web searching on the Vivisimo search engine, 1875–1887
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890

Query Logs
user search behavior of domain-specific information retrieval systems: an analysis of the query logs from PsychINFO and ABC-Clio's Historical Abstracts/America: History and Life, 1208–1220

Query Translation
exploiting the Web as the multilingual corpus for unknown query translation, 660–670
a lexical knowledge base approach for English–Chinese cross-language information retrieval, 233–243
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
user experiments with the Eurovision cross-language image retrieval system, 697–708

Questel-Orbit
intellectual property information: a comparative analysis of main information providers, 1794–1803

Question-Answering Systems
automated judgment of document qualities, 1155–1164
building a reusable test collection for question answering, 851–861
knowledge trees and protoforms in question-answering systems, 550–563

Random Variables
documents and queries as random variables: history and implications, 1138–1154

Ranking
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
improving high accuracy retrieval by eliminating the uneven correlation effect in data fusion, 1962–1973
information systems citation patterns from International Conference on Information Systems articles, 1263–1274
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
using the *h*-index to rank influential information scientists, 1275–1278
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589

Ranking Fusion Model
categorization-driven cross-language retrieval of medical information, 501–510

Rationalism
"irrational" searchers and IR-rational researchers, 222–232

Reading
reading and writing book reviews across the disciplines, 1194–1207

Really Simple Syndication (RSS)
are raw RSS feeds suitable for broad issue scanning? a science concern case study, 1644–1654

Recommender Systems
improving Internet interaction: from theory to practice, 829–833

DOI: 10.1002/asi

Relatedness Measures
identifying a better measure of relatedness for mapping science, 251–263
Relationship Instances
extracting link chains of relationship instances from a Web site, 1590–1605
Relationships
using rhythms of relationships to understand e-mail archives, 1936–1948
Relative Model
understanding competing application usage with the theory of planned behavior, 1338–1349
Relevance
automated judgment of document qualities, 1155–1164
relevance criteria identified by health information users during Web searches, 1368–1382
on relevance distributions, 1126–1129
relevance for browsing, relevance for searching, 69–86
relevance judgment: what do information users consider beyond topicality?, 961–973
a study of interface support mechanisms for interactive information retrieval, 933–948
Reliability Life Testing
some comments on the use of reliability techniques [letter to the editor], 991–992
Represented Information
fundamental forms of information, 1033–1045
Reputation
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770
Research Ethics
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779
Research Fronts
CiteSpace II: detecting and visualizing emerging trends and transient patterns in scientific literature, 359–377
the scientific network of surfactants: structural analysis, 949–960
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
Research Groups
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895
performance-related differences of bibliometric statistical properties of research groups: cumulative advantages and hierarchically layered networks, 1919–1935
the role of the Internet in informal scholarly communication, 1350–1367
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430
trading cultures: resource mobilization and service rendering in the life sciences as revealed in the journal article's paratext, 1909–1918
Research Groups *(Continued)*
what does it mean to be an author? the intersection of credit, contribution, and collaboration in science, 1758–1770
Research Productivity
the role of the Internet in informal scholarly communication, 1350–1367

Sociolinguistics
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337

Sociology of Science
the role of the Internet in informal scholarly communication, 1350–1367

Soft Computing
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
fuzzy techniques for trust and reputation management in anonymous peer-to-peer systems, 528–537
image clustering for the exploration of video sequences, 577–584
knowledge trees and protoforms in question-answering systems, 550–563
soft approaches to information retrieval and information access on the Web: an introduction to the special topic section, 511–514
Web navigation support by means of proximity-driven assistant agents, 515–527

Software Engineering
factors governing the consumption of explicit knowledge, 36–43

Soundex
on the development of name search techniques for Arabic, 728–739

Source Credibility
the influence of structural and message features on Web site credibility, 114–127

Source of Information
the effect of source nature and status on the subjective value of information, 321–329
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677
work roles, tasks, and the information behavior of dentists, 1896–1908

Space Transformation
a cluster-based approach for efficient content-based image retrieval using a similarity-preserving space transformation method, 1694–1707

Spanish
categorization-driven cross-language retrieval of medical information, 501–510

Spatial Representation
a qualitative feature-based characterization of 2D architectural style, 1537–1550

Specificity
broad exploration or precise specificity: two basic information seeking patterns among students, 1440–1450

Spoken Queries
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890

Sponsored Search Results
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
how much of it is real? analysis of paid placement in Web search engine results, 448–461

Stability Measures
feature instability as a criterion for selecting potential style markers, 1519–1525

Statistical Analysis
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
statistical properties of bibliometric indicators: research group indicator distributions and correlations, 408–430

Statistics
classification and powerlaws: the logarithmic transformation, 1470–1486
The FedLemur Project: federated search in the real world, 347–358

Status
the role of the Internet in informal scholarly communication, 1350–1367

Stemming
machine learning for Arabic text categorization, 1005–1010

Stereo Representation Model
a "stereo" document representation for textual information retrieval, 768–774

STN International
intellectual property information: a comparative analysis of main information providers, 1794–1803

Stoplists
ranking indirect connections in literature-based discovery: the role of medical subject headings, 1427–1439

Strategic Planning
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829

Strategy Hubs
strategy hubs: domain portals to help find comprehensive information, 4–24

Strenth of Weak Ties Theory
exploring the role of medical and consumer literature in the diffusion of information related to hormone therapy for menopausal women, 974–988

String Matching
best practices and future visions for search user interfaces, 781–787
on the development of name search techniques for Arabic, 728–739

Structural Equation Modeling
organizational learning capacity and attitude toward complex technological innovations: an empirical study, 264–279
understanding consumer trust in Internet shopping: a multidisciplinary approach, 479–492

Structures
building interoperable vocabulary and structures for learning objects, 280–292
the influence of structural and message features on Web site credibility, 114–127
modeling the invisible college, 152–168

Students. ***See*** **Graduate Students; Undergraduate Students**

Student's *t*-Test
a "stereo" document representation for textual information retrieval, 768–774

Style Analysis
feature instability as a criterion for selecting potential style markers, 1519–1525
introduction to the special topic section on the computational analysis of style, 1503–1505
learning to classify documents according to genre, 1506–1518

Style Analysis *(Continued)*
modal relationships as stylistic features: examples from Seljuk and Celtic patterns, 1551–1560
a qualitative feature-based characterization of 2D architectural style, 1537–1550
structural and affective aspects of music from statistical audio signal analysis, 1526–1536

Subject Expertise. ***See*** **Expert Knowledge**

Subject Terms. ***See*** **Controlled Vocabularies; Index Terms; Search Terms**

Support Vector Machine (SVM)
an effective procedure for constructing a hierarchical text classification system, 431–442
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
link-based similarity measures for the classification of Web documents, 208–221

Surfactants
the scientific network of surfactants: structural analysis, 949–960

Symmetrical Cocitation Matrix
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Synonymy
feature instability as a criterion for selecting potential style markers, 1519–1525

Synthesis of Information
collaborative information synthesis I: a model of information behavior of scientists in medicine and public health, 1740–1749
collaborative information synthesis II: recommendations for information systems to support synthesis activities, 1888–1895

T-Test
a "stereo" document representation for textual information retrieval, 768–774

Taiwan Teleservices and Technologies
a dual-level analysis of the capability development process: a case study of TT&T, 1814–1829

Task Completion Speed
modeling successful performance in Web searching, 1678–1693

Task Importance
who will you ask? an empirical study of interpersonal task information seeking, 1666–1677

Tasks
measuring online information seeking context, part 1: background and method, 1729–1739
measuring online information seeking context, part 2: findings and discussion, 1862–1874
work roles, tasks, and the information behavior of dentists, 1896–1908

Taxonomies. ***See also*** **Ontologies**
dynamic taxonomies and guided searches, 792–796
five-dimensional taxonomy to relate human errors and technological interventions in a human factors literature database, 1221–1232

Teamwork. ***See*** **Collaboration**

Unified Medical Language System (UMLS)
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)

Unified Probabilistic Model
documents and queries as random variables: history and implications, 1138–1154

Universities
evaluating China's university library Web sites using correspondence analysis, 493–500
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
visualizing linguistic and cultural differences using Web co-link data, 1178–1193

Urban Areas
toward a model of the everyday life information needs of urban teenagers, part 1: theoretical model, 1394–1403
toward a model of the everyday life information needs of urban teenagers, part 2: empirical model, 1418–1426

URL (Uniform Resource Locator). ***See also*** **Links and Link Analysis**
Web issue analysis: an integrated water resource management case study, 1303–1314

Usage/Citation Impact Correlator
earlier Web usage statistics as predictors of later citation impact, 1060–1072

User Acceptance
toward an understanding of Web-based subscription database acceptance, 1715–1728

User Interfaces
best practices and future visions for search user interfaces, 781–787
changing the pace of search: supporting "background" information seeking, 838–842
designing a search user interface for a digital library, 788–791
do-it-yourself information technology: role hybridization and the design—use interface, 87–95
dynamic taxonomies and guided searches, 792–796
ejournal interface can influence usage statistics: implications for libraries, publishers, and Project COUNTER, 1243–1248
evidence-based practice in search interface design, 825–828
*f*KWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
"I'm feeling lucky": the role of emotions in seeking information on the Web, 813–818
improving Internet interaction: from theory to practice, 829–833
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
the open video digital library: a Möbius strip of research and practice, 1629–1643
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
reconciling information-seeking behavior with search user interfaces for the Web, 797–799
search histories for user support in user interfaces, 803–807

User Interfaces *(Continued)*
search in the Web shopping environment, 819–824
search on mobile phones, 834–837
search user interfaces: best practices and future visions. introduction and overview, 777–780
a study of interface support mechanisms for interactive information retrieval, 933–948
utilizing a user's context to improve search results, 808–812
which user interaction for cross-language information retrieval? design issues and reflections, 709–722
workspaces for search, 800–802

User Preference
one digital library, two undergraduate classes, and four learning modules: uses of a digital library in classrooms, 1315–1325
user preference: a measure of query-term quality, 1566–1580

User Profiling
Web navigation support by means of proximity-driven assistant agents, 515–527

User Training
toward an understanding of Web-based subscription database acceptance, 1715–1728

Value of Information
the effect of source nature and status on the subjective value of information, 321–329

Values
technology, genres, and value change: the case of little magazines, 862–872

Vector Space Model
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
a "stereo" document representation for textual information retrieval, 768–774

Verbal Queries
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890

Video Digital Library
the open video digital library: a Möbius strip of research and practice, 1629–1643

Video Sequences
image clustering for the exploration of video sequences, 577–584

Virtual Reference Service
encountering virtual users: a qualitative investigation of interpersonal communication in chat reference, 1046–1059

Visual Representation
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628

Visualization Algorithms
identifying a better measure of relatedness for mapping science, 251–263

Visualization of Information. ***See*** **Information Visualization**

Vivisimo Search Engine
Web searching on the Vivisimo search engine, 1875–1887

Vocabulary
building interoperable vocabulary and structures for learning objects, 280–292
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337

Water Resource Management
Web issue analysis: an integrated water resource management case study, 1303–1314

Web-based Subscription Databases
toward an understanding of Web-based subscription database acceptance, 1715–1728

Web Colink Analysis. ***See*** **Links and Link Analysis**

Web Crawling
Web crawling ethics revisited: cost, privacy, and denial of service, 1771–1779

Web Data Mining. ***See*** **Data Mining**

Web Issue Analysis
Web issue analysis: an integrated water resource management case study, 1303–1314

Web Links. ***See*** **Links and Link Analysis**

Web Logs. ***See*** **Blogs; Web Transaction Log Analysis**

Web Pages and Web Sites. ***See also*** **Web Searching; World Wide Web**
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
evaluating China's university library Web sites using correspondence analysis, 493–500
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
extracting link chains of relationship instances from a Web site, 1590–1605
the influence of structural and message features on Web site credibility, 114–127
link-based similarity measures for the classification of Web documents, 208–221
relevance criteria identified by health information users during Web searches, 1368–1382
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
utilizing a user's context to improve search results, 808–812
visualizing linguistic and cultural differences using Web co-link data, 1178–1193
Web issue analysis: an integrated water resource management case study, 1303–1314
Web unit-based mining of homepage relationships, 394–407

Web Portals
an effective procedure for constructing a hierarchical text classification system, 431–442
The FedLemur Project: federated search in the real world, 347–358
strategy hubs: domain portals to help find comprehensive information, 4–24

Web Searching. ***See also*** **Information Retrieval**
a Bayesian model that predicts the impact of Web searching on decision making, 873–880
best practices and future visions for search user interfaces, 781–787
categorization-driven cross-language retrieval of medical information, 501–510

DOI: 10.1002/asi

Web Searching *(Continued)*
changing the pace of search: supporting "background" information seeking, 838–842
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
concept-matching IR systems *versus* word-matching information retrieval systems: considering fuzzy interrelations for indexing Web pages, 564–576
dynamic taxonomies and guided searches, 792–796
evaluating the information quality of Web sites: a methodology based on fuzzy computing with words, 538–549
evidence-based practice in search interface design, 825–828
an examination of searcher's perceptions of nonsponsored and sponsored links during ecommerce Web searching, 1949–1961
The FedLemur Project: federated search in the real world, 347–358
fKWIC: frequency-based keyword-in-context index for filtering Web search results, 1606–1615
gender and Web information seeking: a self-concept orientation model, 1105–1115
how much of it is real? analysis of paid placement in Web search engine results, 448–461
"I'm feeling lucky": the role of emotions in seeking information on the Web, 813–818
improving Internet interaction: from theory to practice, 829–833
the influence of structural and message features on Web site credibility, 114–127
"irrational" searchers and IR-rational researchers, 222–232
knowledge irees and protoforms in question-answering systems, 550–563
modeling successful performance in Web searching, 1678–1693
multilingual Web retrieval: an experiment in English–Chinese business intelligence, 671–683
query expansion behavior within a thesaurus-enhanced search environment: a user-centered evaluation, 462–478
reconciling information-seeking behavior with search user interfaces for the Web, 797–799
relevance criteria identified by health information users during Web searches, 1368–1382
search in the Web shopping environment, 819–824
search on mobile phones, 834–837

Web Searching *(Continued)*
soft approaches to information retrieval and information access on the Web: an introduction to the special topic section, 511–514
strategy hubs: domain portals to help find comprehensive information, 4–24
utilizing a user's context to improve search results, 808–812
Web navigation support by means of proximity-driven assistant agents, 515–527
Web searching on the Vivisimo search engine, 1875–1887
Web unit-based mining of homepage relationships, 394–407
workspaces for search, 800–802
Web Sites. ***See*** **Web Pages and Web Sites**
Web Transaction Log Analysis
Web navigation support by means of proximity-driven assistant agents, 515–527
Web searching on the Vivisimo search engine, 1875–1887
Web Wrapper Agents
Web navigation support by means of proximity-driven assistant agents, 515–527
Weblogs. ***See*** **Blogs**
Webometrics
author cocitation analysis is to intellectual structure as Web colink analysis is to...?, 1487–1502
co-occurrence matrices and their applications in information science: extending ACA to the Web environment, 1616–1628
earlier Web usage statistics as predictors of later citation impact, 1060–1072
interpreting social science link analysis research: a theoretical framework, 60–68
scientific research activity and communication measured with cybermetrics indicators, 1296–1302
visualizing linguistic and cultural differences using Web co-link data, 1178–1193
Weibull Plots
some comments on the use of reliability techniques [letter to the editor], 991–992
Wikipedia
Web links and search engine ranking: the case of Google and the query "Jew," 1581–1589
Wooster, Harold Abbott
Harold Abbott Wooster: a memorial essay, 1974–1976
Word Families
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337

Word Frequency
automatic generation of Japanese–English bilingual thesauri based on bilingual corpora, 891–906
Word Matching. ***See*** **String Matching**
Word Sense Disambiguation Text Collection
word sense disambiguation by selecting the best semantic type based on Journal Descriptor Indexing: preliminary experiment, 96–113, 726 (erratum)
Work
understanding human–work domain interaction: implications for the design of a corporate digital library, 128–143
work roles, tasks, and the information behavior of dentists, 1896–1908
workspaces for search, 800–802
World Wide Web. ***See also*** **Web Pages and Web Sites**
interpreting social science link analysis research: a theoretical framework, 60–68
language evolution and the spread of ideas on the Web: a procedure for identifying emergent hybrid word family members, 1326–1337
Memex at 60: Internet or iPod?, 1233–1242
the role of the Internet in informal scholarly communication, 1350–1367
work roles, tasks, and the information behavior of dentists, 1896–1908
Wrappers. ***See*** **Web Wrapper Agents**
Writing. ***See also*** **Authors and Authorship**
e-mail interviewing in qualitative research: a methodological discussion, 1284–1295
feature instability as a criterion for selecting potential style markers, 1519–1525
a framework for authorship identification of online messages: writing-style features and classification techniques, 378–393
reading and writing book reviews across the disciplines, 1194–1207
Written Queries
written *versus* spoken queries: a qualitative and quantitative comparative analysis, 881–890
Yahoo
how much of it is real? analysis of paid placement in Web search engine results, 448–461
Yule–Simon Distribution
productivity in the Internet mailing lists: a bibliometric analysis, 51–59
Ziv-Lempel Complexity
a qualitative feature-based characterization of 2D architectural style, 1537–1550

DOI: 10.1002/asi
